#### **DETAILED ACTION**

This office action is responsive to amendment filed on 08/20/2004, wherein, claims 2-10, 12-20 and 22-29 are pending for examination, claims 1, 11 and 21 have been canceled, claims 2, 12 and 22, have been amended.

## Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2, 12 and 22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,654,747 and claims 1, 5-6 of U.S. Patent No. 5,966,707. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

Claims 2, 12 and 22 of the present application merely repeat the features of claims 1-3 of US Patent No. 6,654,747 and claims 1, 5-6 of U.S. Patent No. 5,966,707

Application/Control Number: 09/895,889 Page 3

Art Unit: 2161

with fewer limitations. However, it is obvious for an ordinary skilled person in the art at the time the invention was made to remove limitations from the claims for the purpose to extend a more broader coverage of his/hers invention.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 2-10, 12-20 and 21-29 rejected under 35 U.S.C. 102(e) as being anticipated by Van Huben et al. (U.S. Patent No. 6,654,747).

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

**Art Unit: 2161** 

As to claim 2, Van Huben et al. (hereinafter referred as Van Huben) discloses a method as claimed by applicant, comprising:

defining library control functions in a database system, including providing a checkout function to lock at least one cell in a managed database table of the database system [e.g., col. 5, lines 19-54]; and

utilizing the library control functions via structured query language statements to ensure data integrity during accessing of complex data objects comprising Opaque data types in the database system [e.g., col. 22, lines 1-42].

As to claim 3, except the features recited in claim 2, Van Huben further discloses that defining library control functions further creating a set of update and delete triggers in correspondence with the checkout functions [e.g., col. 10, lines 42-57, Units: 93-95, Fig. 9B and associated texts].

As to claim 4, except the features recited in claim 2, Van Huben further discloses that creating a set of control tables for each selected table that contains columns enabled for control under the library control functions [e.g., col. 4, lines 13-16, col. 21, lines 48-50].

As to claim 5, except the features recited in claim 2, Van Huben further discloses that [e.g., the units: 51, 52, Fig. 5A, 53, Fig. 5B and associated texts].

Art Unit: 2161

As to claim 6, except the features recited in claim 2, Van Huben further discloses that [e.g., col. 2, lines 16-40].

As to claim 7, except the features recited in claim 2, Van Huben further discloses that [e.g., the Control Repository Access Layer section of col. 17 – col. 18, line 52].

As to claim 8, except the features recited in claim 2, Van Huben further discloses that the workflow document further comprises a decomposed XML document [e.g., the Decryption processing performed by Command Translator B, col. 18, lines 43-46, the third XML document at col. 22, lines 51-52].

As to claim 9, except the features recited in claim 2, Van Huben further discloses that the decomposed XML document is received via electronic mail [e.g., col. 17, lines 38-43; col. 22, lines 43-66].

As to claim 10, except the features recited in claim 2, Van Huben further discloses that the set of update and delete triggers streamline performance of each workflow step from the decomposed workflow document [e.g., col. 18, lines 16-46].

As to claim 12-20 and 22-29, these claims recited the same features as claims 2-10, in form of computer system and computer readable medium product, hence are rejected for the same reason.

Art Unit: 2161

## Response to Arguments

Applicant's arguments with respect to claims 2-10, 12-20 and 22-29 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

To expedite the process of re-examination, the examiner requests that all future correspondences in regard to overcoming prior art rejections or other issues (e.g. 35 U.S.C. 112) set forth by the Examiner prior to the office action, that applicant should provide and link to the most specific page and line numbers of the disclosure where best support is found (see 35 U.S.C. 132).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Brown et al. (U.S. Patent No. 6,658, 415) which discloses a system to monitoring and managing user access to content via a universally accessible database.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susan Y Chen whose telephone number is 571-272-4016. The examiner can normally be reached on Monday - Friday from 7:00-4:30.

Art Unit: 2161

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Safet Metjahic can be reached on 571-272-4023. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
